OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)

This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm x 100 mm (6" x 4") cards.

TOPICS

This is an SDI service based on standard pro-

files. There are over 90 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their

own internal information and current-awareness services.

JAPAN UPDATE

Six high-technology subjects are covered by Japan Update Services. Abstracts are provided for articles selected from about 300 Japanese journals and despatched weekly on conveniently-sized cards. This inexpensive service is designed to help engineers stay abreast of technological developments reported in the Japanese literature.

PROPERTIES OF Mercury Cadmium Telluride

This latest publication in the EMIS Datareviews series is the first authoritative work of reference on the properties of the Group II-VI ternary alloy Mercury Cadmium Telluride (HgCdTe). Current interest in this material centres on its unique infra-red detection properties and its resulting wide range of applications in the fields of meteorology, aerospace and defence.

To produce semiconductors to strict specifications, it is necessary to characterise them fully and consequently to have reliable materials data. This book will satisfy these requirements for MCT and so serve to advance research in the field.

Contents include:

- **Mechanical & Thermal Properties**
- **Diffusion**
- **Band Structure & Carrier Properties**
- **Segregation of Impurities**
- **Defect Etching**
- **Dielectric & Optical Properties**
- **Annealing & Doping**
- **Surfaces & Interfaces**
- **Precipitation**
- **Piezo-electric, Elasto- & Electro-Optic Properties**

Properties of Mercury Cadmium Telluride casebound 280 x 210mm is priced at £75 UK, \$170 USA, and £95 elsewhere.
